Subject: Danville Project - Message sign hackers
Attachments: photo.JPG

FYI: Some hackers have made their way into the contractor's (Pike) message signs on the Danville (route 2). WCAX & others are all over it (see the CAX facebook page pasted). Brian is on camera with WCAX & New England Network News (Jack Thurston) today. He will be talking about the steps we are taking to try to mitigate the traffic problems. My thought is to take the sign- hacking in stride, (since the humor is getting a good reception out there), but to take very seriously the traffic. We are currently in negotiations with the contractor about a series of measures to try to address/improve the situation. Note that these negotiations can be tricky because we do not want them to demand changes to the contract and higher costs.
