

Please don't vote to allow abortions in Vermont. My babies were my babies as soon as I knew I was pregnant. Both of my girls were early babies, one by 2 weeks and another close to 4 weeks. They are both healthy active and very pleasant young ladies. They love music and reading, care greatly about others and this world would miss 2 people that who knows what type of an effect they will have on the people they meet. Under the abortion law, I could have ended their lives before they even began. When I was pregnant, I was asked if I wanted genetic testing to make sure my baby was healthy. I declined because it wouldn't have changed a thing for me. I have worked with special needs children and they have all had a positive impact on my life. I know so many people who would live to adopt if they could afford it. Instead of putting money towards ending the lives of these precious babies, put the money into helping them to find loving parents who want them. Let these living loving babies be loved and live to their full potential in life.
