

Enclosed please find the letter which was sent home to families district-wide in the fall of 2018 (I believe middle level and above). Also enclosed is a scan of the materials provided at the high school when a request for contraceptives is made. A copy of the curriculum delivered to students in 9th grade Wellness and upper level Health courses is in a second email.

Our school Nurse, Lola Noyes can be available to answer questions about how many students have access and how many parents have denied access, tomorrow via phone. All she needs to know is the time, number, and basic process of what to expect.

Please let me know if you have any questions.
