Dear Senators and Representatives,
Our fossil fuel fed global climate crisis is the number one threat to all the animals (human and non) on our planet, and I encourage you all to pass these very important bills to reduce Vermont's dependence on fossil fuels.

I also encourage you all to watch the panel held at Middlebury College on 4/8/19 called "The Ethics of Climate Change: A Panel Discussion with Bill McKibben, Rupert Read and Kim Cobb." The link is vimeo.com/329640801. These are rugged times, and every Vermonter is counting on you, or state political leaders, to do all of which you are capable to champion action/legislation that mitigates Climate Change.

Thank you for your attention,
Mima Tipper
