Total
investment of
\$1,372,000

Programming
in
124 schools

Over 34,000
students
impacted

Support for Farm to School Programming

“At a time when obesity rates among our kids continues to rise, we need to do more to educate families and their children about the value of healthy, nutritious lifestyles and choices. One of the best places to do that is in our schools, where we know students form the foundations of lifelong eating habits.”

-US Senator Patrick Leahy

“Farm to School Programs are an investment in agricultural literacy, local economies, and community stewardship which can connect us to a valuable understanding and appreciation of where our food comes from, while also influencing healthful eating habits.”

-Vermont Secretary of Agriculture Chuck Ross

“How do I engage ALL students in a way that is meaningful and productive? Educators are always looking for ‘the topic’ that will spark a student’s interest, ‘the topic’ that will engage the student in reading, writing, math, social studies, science, art, music, PE and other disciplines. I’ve found that Farm to School education, along with overall health and wellness education, is THE topic.”

-Sharon Elementary School teacher Keenan Haley

What’s Next? According to 2014 Grantees, Factors Critical to Farm To School Program Success Include:

Involvement
Dedicated
Sustainable

By food service staff, administrators, teachers, farmers, and community volunteers

Farm to school coordination staff

Funding to enable long-term planning/implementation of farm to school & agricultural literacy curricula & local food procurement
