

Dear Committee Members,

As a Physician, a Vermonter, and a Woman, it is imperative this state supports a women's access to all reproductive services that modern medicine has to offer. It is everyone's right to choose what is best in regards to their health care upon consulting their doctor, and access to abortion services is an important part of that. I firmly believe patient's come first, and providing these services does just that.

Thank you,

Bronwyn H Bryant, MD

Department of Pathology and Laboratory Medicine
