

## H.57 VOTE NO!

I am sitting here baffled!! with a lump in my throat. This goes TOO FAR! We as a society already have all kinds of education, and prevention for unwanted pregnancies.

1) Sex education is being taught in schools.... ?? grade 5???

2) Free condoms in the State building bathrooms, all drs offices, school nurses, and planned parenthood

3) We offer the morning after pill. I think one can go right to a pharmacist, and request one, without any prescription.

4) We have abortion availability until? 16? or 20 weeks?

5) We have the Stork Program.....where one can drop off a baby at Hospitals, Police Stations, with NO questions asked.

6) We have Adoption!

.This Bill would allow NO limits on abortion, even at the latest stages of pregnancy; no parental involvement requirements for a minor daughter seeking an abortion; and increased taxpayer funding of abortion. It would even allow late term abortions on viable babies up until birth! (shared from VT Right To Life FB Page)

There is NO room or excuse for an abortion at late stage pregnancy. NONE!

This goes beyond the human morality! We can not standby and witness such horrific events because normalized in this State.

This bill promotes, death, instead of life.
