Changes by the minute, so I promise not to send too many of these, but it now may be the case that NJ request for black hawks has been filled by other states. The Governor's order activating the guard for the limited purpose of assisting other states stands and we'll respond to other requests as we receive them. Thanks.

All, The Governor has formally activated the Vermont National Guard for the purpose of providing assistance to other states in response to requests. At this point we are aware of a request for black hawks by NJ for search and rescue. That request will be formalized tonight and the helicopters (2 at this point) and crew will likely go tomorrow morning.
