**Gov. Shumlin Statement on Supreme Court Clean Power Plan Decision**

**MONTPELIER** – Gov. Peter Shumlin issued the following statement after the Supreme Court put on hold the Obama Administration’s Clean Power Plan while litigation against the plan proceeds.

“This is incredibly disappointing news. The forces fighting President Obama’s common sense plan are those with a stake in the dirty energy status quo that is of polluting our air, water, and forests and contributing to global climate change. Their desperate attempt to make a profit at the expense of our health and the future of the planet is standing in the way of serious action to combat climate change and preserve a livable planet for future generations.

“It is no surprise that the suit over the Clean Power Plan was brought by proponents of the coal industry. That industry, and those who support it, will do everything they can to boost their profits, even if it means imperiling our planet’s future. This is just one more example why Vermont should not be in the business of supporting the coal industry and should divest from coal stocks.”
