

I hope this message gets to you. I apologize for getting my comments in at the last moment.

I urge you preserve women's right to abortion access. Our access to health care needs to be protected. This is a basic human right. As women, I fear that our decisions about our health care and medical decisions are being undercut by lawmakers. Women have a moral right to decide what we do with our bodies. It is in the best interest of all women and our communities to allow us access to safe abortions, free from judgement, harassment and persecution.

Thank you for your support.
