

While I'm not able to make it to this afternoons meeting at the statehouse, I'm completely appalled that Vermont legislators are even considering passing this evil bill and misrepresented (lied) about its purpose to other legeslators. You don't go acting all criminal ripping a living being from the womb to fuel money for haulocaust abortion giant Planned Parenthood. Thats wicked evil. it's gruesome enough to suck the developing brain of an unborn infant to collapse the skull so the baby dies then sell the body parts. But this is inhumane and cruelty at it's finest.
