I realize that the State is in a budget crisis and the burden is on the Appropriations Committee to balance need to income. However, my goal is to look to the future of our State. Certain investments are essential to recognize that our future depends on making the right choices today. We must protect our landscape, create the environment for the youth, and encourage job creation. I think the best way to accomplish these goals is to continue the investment in our Working Landscape program and invest in a robust broadband network. I am hopeful that you all agree and can find the way to accomplish these investments.
