**To:** Springer, Darren  
**Subject:** my approach tomorrow

will be to create a committee amendment that will wrap up  
\* Campbell  
\* Bray  
\* IBM amendments

and possibly something from Driscoll, but I don't know what you think of it

We will create a new amendment that will combine what remains of our committee amendment of a week ago and adds the new stuff -- so that we present a single report, not the original report and then an amendment to that report, which would make it hard for people to follow
