I have asked our head deer biologist about sending Pete down south, including animal safety, potential longevity, etc. I'll let you know what he says.

We think Pete is fine – however, now that I know Windham is actually interested I will ask Patrick to do what it takes so that we are sure it is safe for the other animals. (Also – as I understand it, Pete will do much better in a petting zoo environment than where he is right now.) Deb

Thanks Deb! Are you moving forward on testing Pete the Moose? Windham is interested but wants to know the state of his health...

Hi Alex, As we discussed yesterday, I have attached the LCRCC position on permit reform as well as the short version of the climate change report – both given to me by Ernie Pomerleau. Sorry I cannot make tomorrow's meeting on transportation – it is during our agency open house. Let's chat again soon. Deb
