

Governor Peter Shumlin
Pavilion Office Building, 5th Floor
109 State Street
Montpelier, VT 05609-0101

Dear Governor Shumlin,

I am writing to show support for the bold plan to move Vermont to 90% renewable energy by 2050. I am also writing because I am not a Vermonter. Rather, I am a supporter of clean energy, and a potential Vermont tourist.

If Vermont pursues this ambitious energy plan, including an increase in wind generation, know that my desire to visit will not diminish. Rather, my family and I would be more likely to visit Vermont and support your efforts towards a greener tomorrow.

Vermont has an incredible opportunity to be a leader in renewable energy. It would be fitting for the Green Mountain State to also be known as the Green Energy State. I hope that my own home state may soon follow your lead.

Thank you, Governor Shumlin for being a leader on this issue. Please take this letter into account when deciding the appropriate role for wind power in Vermont.

Sincerely,

Mrs. Arline Heimert
Robinson Circle
Winchester, MA 01890

Montpelier, VT 05609-0101

Dear Governor Shumlin,

I love Vermont! I visit Vermont at least three times a year, sometimes more. Windfarms in select places will not deter me from visiting. Some windfarms I've seen in California are designed to be aesthetically pleasing with the contours of the land echoed in the design. I am sure that windfarms will not keep me away from Vermont. They may even draw me to visit more often.

I am writing to show support for the bold plan to move Vermont to 90% renewable energy by 2050. I am also writing because I am not a Vermonter. Rather, I am a supporter of clean energy, and a potential Vermont tourist.

If Vermont pursues this ambitious energy plan, including an increase in wind generation, know that my desire to visit will not diminish. Rather, my family and I would be more likely to visit Vermont and support your efforts towards a greener tomorrow.

Dear Governor Shumlin,

I am writing to show support for the bold plan to move Vermont to 90% renewable energy by 2050. I am also writing because I am not a Vermonter. Rather, I am a supporter of clean energy, and a past and future Vermont tourist.

If Vermont pursues this ambitious energy plan, including an increase in wind generation, know that my desire to visit will not diminish.

Montpelier, VT 05609-0101

Dear Governor Shumlin,

I am writing to show support for the bold plan to move Vermont to 90% renewable energy by 2050. I am also writing because I am not a Vermonter. Rather, I am a supporter of clean energy, and a potential Vermont tourist.

If Vermont pursues this ambitious energy plan, including an increase in wind generation, know that my desire to visit will not diminish. Rather, my family and I would be more likely to visit Vermont and support your efforts towards a greener tomorrow.

Vermont has an incredible opportunity to be a leader in renewable energy. It would be fitting for the Green Mountain State to also be known as the Green Energy State. I hope that my own home state may soon follow your lead.

Thank you, Governor Shumlin for being a leader on this issue. Please take this letter into account when deciding the appropriate role for wind power in Vermont.

Montpelier, VT 05609-0101

Dear Governor Shumlin,

As a nature lover, and someone who loves Vermont, and whose brother skis and works there every winter, I was SO glad to hear about your plan to move Vermont to 90% renewable energy by 2050! Personally, I find wind farms beautiful, both aesthetically and in terms of what they represent. I would be proud and happy to live in a state that has wind farms.

I am not a Vermonter, but I am a Vermont tourist!

If Vermont pursues this ambitious energy plan, including an increase in wind generation, know that my desire to visit will not diminish. Rather, my family and I would be more likely to visit Vermont, and to encourage all our friends to visit too, and support your efforts towards a greener tomorrow.

Vermont has an incredible opportunity to be a leader in renewable energy. It would be fitting for the Green Mountain State to also be known as the Green Energy State. I sincerely hope that my own home state of Massachusetts may soon follow your lead!

Thank you, Governor Shumlin for being a leader on this issue. Please take this letter into account when deciding the appropriate role for wind power in Vermont.
