

Hello my name is Michael Ewing, I grew up in Shelburne VT. I try to keep an open mind and find middle ground in various issues. However the issue that has become front and center is this new push for "late term abortion" privileges. The argument for such is greatly flawed in that it diminishes the value and rights of what many rightly consider a human life not just an embryo. This assertion that these children are 100% human and should be treated as such, with rights and privileges is not junk science but based on some obvious facts. The opposite viewpoint is one that shows shocking similarity to the mentality of Nazi Germany in the 1930s, that subtly swept its way into a whole population. The use of Hitler in drawing similarities and attacks on politicians has become the game of the day, but in this case it is a real and tangible conclusion as it showcases the barbarism and cheapening of human life, expedience over ethic and lack of compassion and cruelty toward the weak. If anything could mark Hitler it was this. . I strongly urge the state of VT not to buy into such a frame of reasoning, and place love, compassion and equity above politics and expedience. Thanks for taking the time to give myself and others a voice in this.

Sincerely,

Michael Ewing
