

greetings,

i'm unable to make the hearing on wednesday (am working). i am in support of H57. i understand that we can leave electronic testimony with you? i just wanted to remark: the last two women i know who ended their pregnancies - were both married, both had children, both wanted to become pregnant again, both chose to end those pregnancies - one after learning of gross chromosomal abnormalities - the other after learning that she had stage 4 cancer. women choose to end pregnancies for lots of reasons - none of which are anybody's business but their own. women's rights are human rights - women deserve full agency over their own bodies.

thank you,

jackie stanton
