Subject: Bill H.513 Amendment - Fiber To Home ONLY

Please amend Bill H.513 so it enables Fiber to the Home ONLY and specifies that antennas larger than 2G will NOT be attached to utility poles

This is a very serious issue. We are being asked to sacrifice health and wellbeing to promote the interests of the few who will be able to profit. Please think deeply about this. Vermont can THRIVE without 5G -- and people will flock here to enjoy our natural beauty, the same way they truly appreciate roads without billboards, because we preserved beauty over profit.

Best regards,
Nancy Crompton
