

## Vermont High School Graduates Postsecondary Enrollment Rate

This report represents Vermont students who graduated with a regular high school diploma and enrolled in an institution of higher education within 16 months of their high school graduation date. This rate is **not** based on the 9th grade cohort. These percentages were derived using postsecondary data collected by the National Student Clearinghouse (NSC).

The National Student Clearinghouse collects enrollment data from ~98% of the postsecondary institutions that participate in Title IV Student Loans. While this captures the majority of postsecondary enrollments, it may not include many trade, vocational, military, and international institutions, or apprenticeship programs. As well, this report does not include publicly tuitioned students that attend out of state High Schools due to demographic issues. Also, students and schools can opt for a Family Educational Rights and Privacy Act (FERPA) blocker on their enrollment records and therefore not be included in NSC reports.

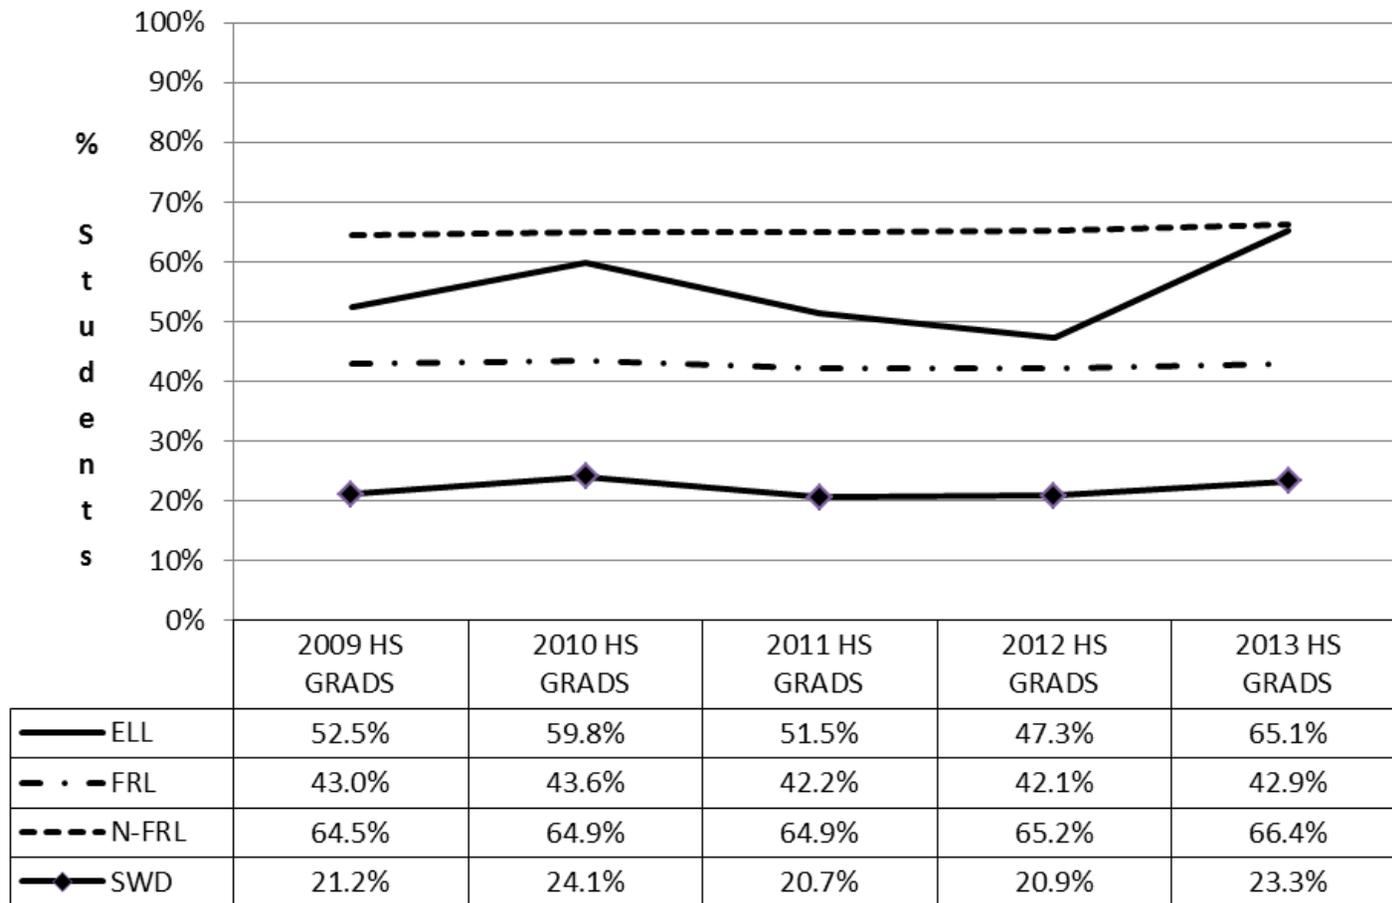

It is also important to note that there may be a number of reasons for a secondary graduate not to continue to a postsecondary experience, or not to persist. While the Agency of Education works to eliminate inadequate preparation as a reason, we must also recognize that other factors may come into play. The rising cost of higher education and the potential debt burden are certainly significant factors in this important decision.

## Length of Time for High School Graduates to Enroll in Postsecondary (2009 - 2014)

## Vermont High School Graduates Postsecondary Persistence Rate

This report represents Vermont students who graduated with a regular high school diploma and enrolled in an institution of higher education within 16 months of High School Graduation; and persisted in postsecondary for at least three semesters within two academic school years. These percentages were derived using postsecondary data collected by the National Student Clearinghouse (NSC).

The National Student Clearinghouse collects enrollment data from ~98% of the postsecondary institutions that participate in Title IV Student Loans. While this captures the majority of postsecondary enrollments, it may not include many trade, vocational, military, and international institutions, or apprenticeship programs. As well, this report does not include publicly tuitioned students that attend out of state High Schools due to demographic issues. Also, students and schools can opt for a Family Educational Rights and Privacy Act (FERPA) blocker on their enrollment records and therefore not be included in NSC reports.

It is also important to note that there may be a number of reasons for a secondary graduate not to continue to a postsecondary experience, or not to persist. While the Agency of Education works to eliminate inadequate preparation as a reason, we must also recognize that other factors may come into play. The rising cost of higher education and the potential debt burden are certainly significant factors in this important decision.
