I don't quite get it ... a green infrastructure committee ...

For example, I wonder what is "green", how much it costs, is this something that falls on communities and businesses, is the green component an added expense, the council "may" choose a chair, meet no less than twice a year (seems a little thin), it appears all members are from inside government, and the goals are what I would expect from state government already.

I anticipate that there are good answers to these questions, and if there are and the Governor is well briefed, OK by me! I'm just anticipating a little push-back from press perhaps.

Sue

Hi Alex - This is the EO. We were thinking of making the kick off meeting of the council a press event - opportunity for the governor to ceremonially resign the EO. We could try to come up with an interesting venue. Deb

All, I just need final ok by each of your agencies on this EO as re-drafted (mostly minor changes/ standard "council EO" things added since you last saw, but please review). Then we will be ready for signature. Thanks.
