

**Twenty-seventh Report on the  
Status of the Petroleum Cleanup Fund**

**10 VSA § 1941**

**January, 2015**

This report includes a review of Petroleum Cleanup Fund receipts and disbursements for the fiscal year 2014. An evaluation of the effectiveness of the Fund in meeting its legislative intent, and a review of the reasonableness of remediation costs is also included. This report also includes recommendations to address funding shortfalls in the heating fuel account.

Prepared by: The Petroleum Cleanup Fund Advisory Committee

## PETROLEUM CLEANUP FUND ADVISORY COMMITTEE MEMBERS

Deb Markowitz:	Secretary, Agency of Natural Resources
Chuck Schwer:	Designated representative of the Commissioner, Department of Environmental Conservation (DEC)
Kevin Gaffney:	Designated representative of the Commissioner, Department of Financial Regulation
Joe Choquette:	Vermont Petroleum Association
Senator Mark MacDonald	
Representative Mike Marcotte	
Scott Bigger:	Designated representative of Lowell T. Spillane, Retail gasoline dealer
Dick Barnes:	A.R. Sandri, a licensed gasoline distributor
Matt Cota:	Vermont Fuel Dealers Association
Peter Bourne:	Bourne's Incorporated, a licensed fuel dealer
Peter Tucker	A licensed real estate broker

Cover photo: A 193 gallon kerosene release in Alburgh in January 2014

## **Executive Summary**

This is the twenty-seventh annual report for the Petroleum Cleanup Fund (PCF). This report will provide a review of receipts and disbursements for fiscal year 2014, in accordance with 10 V.S.A. § 1941 and will evaluate the effectiveness of the PCF in meeting its legislative intent. This report will highlight financial challenges within the fund and will include recommended solutions.

In FY14 the PCF continued to be the primary financial responsibility mechanism for Vermont underground storage tank owners. The PCF also provided financial resources necessary to remediate petroleum contamination at schools, homes, businesses, farms, churches, public work facilities and many other locations. The PCF provides a means to remediate releases that threaten public health and the environment. Petroleum releases have been discovered at more than 3,800 separate properties, with contamination discovered in drinking water wells, in the indoor air of homes and businesses, seeping into surface water bodies and at dangerous levels in public utility lines. Without the PCF many Vermont businesses, homeowners and public entities would struggle to fund expensive cleanups.

The continued success of the PCF depends upon the continued solvency of the fund. There remains critical site cleanup work needed at 1,000s of petroleum contaminated properties. An actuarial study completed in 2005 found that the fund was technically insolvent (projected liabilities exceed assets of the fund) through 2015. As a means to manage this situation, site cleanups need to be prioritized each year to account for limited funds. A \$2.8 million transfer of funds out of the PCF in FY09 further increased the gap between projected liabilities and fund assets. Since the last actuarial study was conducted 10 years ago, the Committee recommends that a new actuarial analysis of the PCF be conducted in 2015. This analysis will provide valuable financial information to determine the overall long term health of the PCF.

The Committee reviewed the residential AST and UST grant program. This program provides grant money to low income Vermonters to upgrade or replace aging high risk petroleum storage tanks, both aboveground and underground. Over 2,000 tanks have been replaced with state of the art tanks thus preventing the likelihood of a spill. The Committee has found that the current grant amounts do not provide enough incentive for low income Vermonters to move forward with this important work. The Committee recommends that the AST and UST grant program be amended to increase the annual cap from \$350,000 to \$400,000 and to increase the cap of individual grants from up to \$2,000 to \$3,000 for outside ASTs and up to \$4,000 for USTs.

## **Description and Purpose**

This is the twenty-seventh annual report on the status of the PCF. This report will look at the effectiveness of the fund in meeting its intended purpose, will review the status of cleanups from motor fuel and heating oil releases from both aboveground and underground heating oil storage tanks, will review the farm and residential underground storage tank (UST) and aboveground (AST) grant program and will provide future PCF projections and recommendations for changes to the PCF.

In 1985, the General Assembly enacted Vermont's first law to regulate the construction, maintenance and operation of underground steel tanks used for the storage of petroleum products. Act 66 of the 1985 session established standards for new construction, and set a deadline of June 30, 1998, later amended to December 22, 1998, for the removal or replacement of unprotected USTs.

In 1988 the Legislature created the PCF, and appointed this Advisory Committee to oversee the financing, effectiveness and conduct of the program. The primary purpose of the PCF is to protect public health and the environment by paying for cleanup and restoration of contaminated soil and groundwater caused by releases from underground petroleum storage tanks, and to compensate third parties for property damage and bodily injury. Many changes have been made since 1988, including the inclusion of pollution coverage for aboveground storage tanks (ASTs) and a farm and residential UST and AST grant program. The Fund also provides loans to tank owners for tank removal, replacement, and upgrade of equipment. The sunset date for filing a claim against the Fund is July 1, 2019.

The PCF provides financial assurance to UST owners, who are required by state and federal law to provide coverage for up to \$1.24 million for cleanup and \$1 million for third party liability. Since such affordable comprehensive insurance coverage continues to be difficult or impossible to find for tank owners, the PCF enables tank owners to meet their financial responsibility (FR) requirements. By law, the U.S. EPA must approve the operation and viability of a state fund before it may serve as a financial responsibility mechanism for UST owners. EPA accepted Vermont's fund as a financial assurance mechanism in 1990, with the requirement that a minimum balance of \$1 million be maintained.

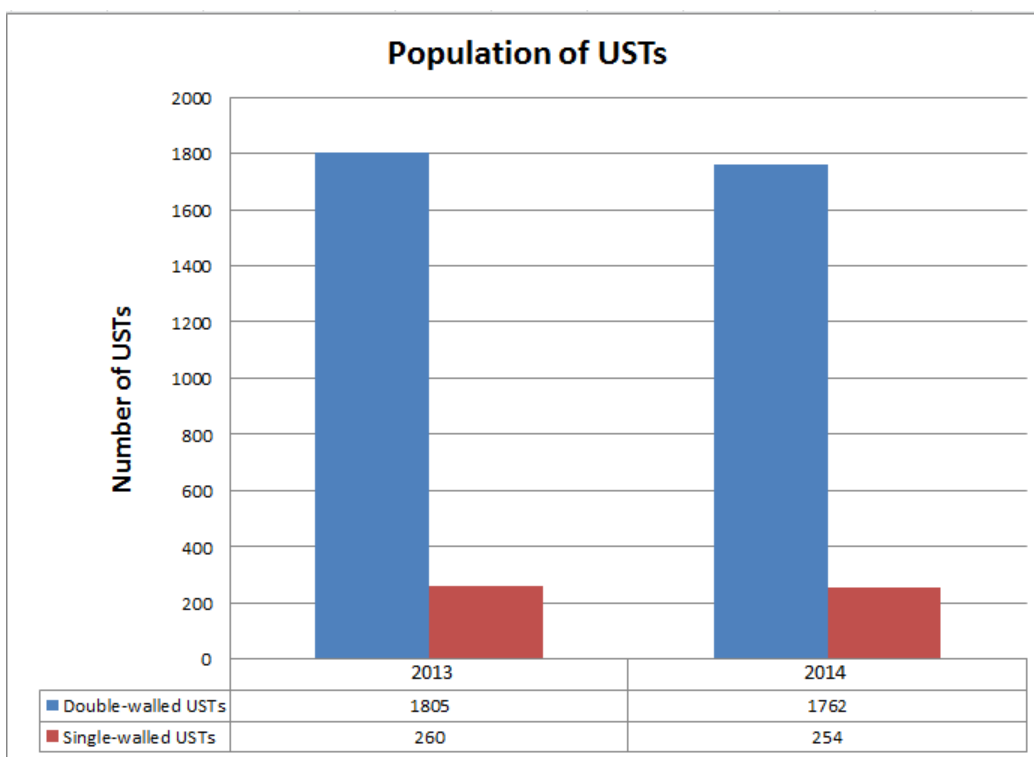

In 2004, the Legislature extended coverage to homeowner heating oil tanks and enacted a fee on heating fuel to create a revenue source for the heating oil related activities covered by the PCF. The PCF was also divided into two separate accounts: a motor fuel account and a heating oil account, with both revenue and expenditures to be managed within each account. In 2010, the fee on heating fuels was increased from a ½ cent per gallon to a full cent.

Revenue for the motor fuel account comes from an annual assessment fee of up to \$100 per tank on most underground tanks, and a "distributor licensing fee" of one cent per gallon of motor fuel sold in the state. Additional revenue comes from the repayment of loans, recovery of some costs from responsible parties, and interest accruing upon any cash balance in the fund. Revenue for the heating fuel account is generated from a licensing fee of one cent per gallon of heating oil and kerosene sold in the state. The sunset date for collection of the motor fuel and heating fuel fees is April 1, 2021.

Expenditures include the cost of cleanup, third party payments, loans to tank owners, grants to homeowners to assist in the removal of heating oil USTs and ASTs and administrative expenses. Each uninsured cleanup undertaken in the state becomes eligible for fund assistance after the party responsible for the tank meets a certain "deductible," a co-insurance payment based on the circumstances of ownership. For commercial entities, the deductible is set at \$10,000 per occurrence, although single-walled tank owners pay a higher deductible, and commercial heating oil USTs less than 1,100 gallons pay a \$250 deductible. For homeowners, a deductible of \$250 must be met. Owners of commercial heating oil ASTs meet a \$1,000 deductible.

## Risks to Fund Solvency

One of the biggest risks to the fund is the remaining population of single-walled underground storage tank systems. Beginning on July 1, 2014, single-walled tank owners pay a higher annual tank assessment fee and be assessed a higher deductible starting on July 1, 2014. Over the past year, the number of single-walled USTs has been reduced from 260 to 254. This represents 12.5 percent of the tank population. A leak from one of these systems might potentially be undetected due to the lack of secondary containment and can cause considerable harm in the environment.

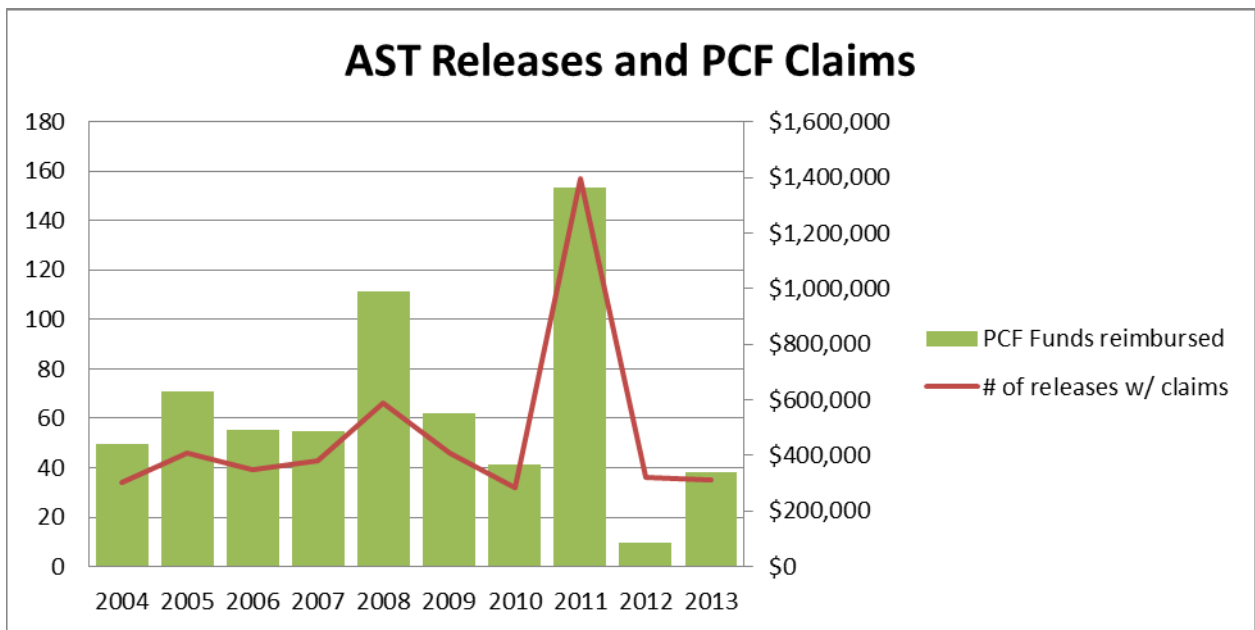

The solvency of the PCF also remains at risk due to the large number of contaminated properties that are eligible for reimbursement. Forty-two new UST sites and 93 new AST spills were discovered in 2014 adding to the total of over 3,800 sites discovered statewide since 1988. This large number of contaminated properties will result in continued disbursements from the PCF. A number of older sites remain that require remediation and hence future PCF disbursements. These older sites tend to be the most expensive sites to cleanup in part due to the size and complexity of the release. The USEPA Office of Underground Storage Tanks has made addressing the site backlog a priority. Of the approximate 1,000 sites remaining in an active status where PCF eligible work needs to be completed; 696 of these are leaking motor fuel UST sites. Attachment 2 provides a detailed list of properties that have received reimbursements from the PCF for motor fuel releases.

The table below details disbursements from the fund from both the motor fuel account and the heating fuel account. This table highlights the shortfalls in the heating oil account from 2005 until the present, as years 2005 -2009 required a transfer of \$3,400,000 from the motor fuel account. This table also displays transfers of funds by the legislature since the fund was established in 1989. An actuarial study completed in 2005 found that the fund was technically insolvent (projected liabilities exceed assets of the fund) through 2015. A \$2.8 million transfer of funds out of the PCF in FY09 has further increased the gap between projected liabilities and fund assets.

Annual Petroleum Cleanup Fund Income							
Year	License Fee	Tank Fee	Interest	Loan payment	Heating Oil Fee	Cost Recovery	General Fund
1988		\$441,300					\$700,000
1989	\$1,851,595	\$571,800	\$68,864				
1990	\$3,305,119	\$518,005	\$174,126	\$46,562			
1991	\$3,414,485	\$539,000	\$204,167	\$168,290

1994	\$4,134,140	\$440,183	\$128,579	\$669,144			
1995	\$3,500,732	\$345,593	\$201,995	\$524,100			
1996	\$3,310,563	\$488,150	\$102,564	\$428,431			\$700,000
1997	\$3,214,204	\$204,487	\$183,473	\$989,125			
1998	\$3,522,001	\$229,284	\$180,275	\$208,740	\$6,412		(\$700,000)
1999	\$3,738,822	\$409,768	\$548,796	\$349,800	\$20,600		
2000	\$5,118,522	\$813,761	\$229,195	\$80,000	\$52,000		
2001	\$5,257,006	\$676,352	\$394,092	\$234,245	\$80,665		
2002	\$3,106,777	\$297,238	\$216,969	\$322,418	\$120,211		\$1,776,000
2003	\$4,207,188	\$467,880	\$313,835	\$114,170	\$79,860		
2004	\$4,252,202	\$904,078	\$184,517	\$132,596	\$116,502		(\$530,000)
2005	\$2,903,051	\$1,314,386	\$201,811	\$64,591	\$165,201	\$750,000	
2006	\$2,395,493	\$1,226,169	\$263,432	\$40,000	\$133,652	\$750,000	
2007	\$3,133,207	\$1,186,023	\$390,125	\$103,298	\$96,938	\$750,000	
2008	\$4,140,308	\$1,788,703	\$228,681	\$384,680	\$192,131	\$750,000	\$2,807,618
2009	\$4,576,012	\$1,330,821	\$687,895	\$103,730	\$281,101	\$400,000	(\$750,000)
2010	\$4,644,337	\$1,271,377	\$258,278	\$401,494	\$181,284		(\$300,000)
2011	\$3,029,500	\$1,257,481	\$263,049	\$161,312	\$332,908		
2012	\$2,425,452	\$1,345,474	\$364,641	\$30,850	\$297,945		(\$750,000)
2013	\$3,838,131	\$982,446	\$319,623	\$10,900	\$389,704		
2014	\$3,203,625	\$1,028,485	\$312,522	\$481,371	\$334,880		
Total	\$87,202,073	\$18,008,139	\$6,475,563	\$8,328,454	\$2,881,994	\$3,400,000	\$5,978,618

There has been a decrease in both the number and total cost of AST cleanups to the PCF in the past two years (see figure below). This decrease is likely the result of both the AST residential grant program along with the adoption of AST rules in 2011. As more and more tanks are upgraded to the new standards, fewer and fewer tank releases will occur. The figure below also highlights the vulnerability of the fund. In 2011, Tropical Storm Irene caused over 90 AST releases costing the PCF over \$800,000 of cleanup expenses. The legislature provided \$750,000 in funds to cover these costs. Without this additional income the fund could not have absorbed these higher costs.

The PCF has provided cleanup funds for heating oil contamination at schools, homes, businesses, farms, churches, public works facilities and many other locations. Attachment 3 provides a detailed list of properties that have received reimbursements from the PCF for heating fuel releases. The farm and residential grant program for heating fuel tanks continues to remain very successful, as hundreds of tanks are removed each year.

The PCF's highest priority is to protect human health and the environment from exposure to petroleum from tank releases. This was highlighted at a Barre site where explosive gasoline vapors were discovered in the fall of 2012 in the town's sewer system and in people's homes causing unhealthy exposure to the residents. In addition, hundreds of people were at risk of severe injury and death had there been an explosion in the sewer system. Immediate corrective action eliminated this significant risk to public health.

More than 3,800 separate properties have been discovered with contamination and many of these have affected drinking water wells, contaminated indoor air of homes and businesses, have migrated into surface water bodies and have been found at dangerous levels in public utility lines. For example, more than 200 separate sites have been discovered where nearly 1,000 public or private drinking water wells have been contaminated. Attachment 4 provides a list of the number of sites discovered each year that have had a direct effect on a sensitive receptor. To address human health and environmental exposures to releases the fund has authorized proactive measures which include rapid initial response to releases, providing bottled water and point-of-entry treatment for contaminated drinking water, aggressively recovering free product, protecting surface water bodies, indoor air remediation and mitigation of dangerous petroleum vapors.

Sites that have a direct effect on public health and the environment are the program's most critical priority and demand the greatest level of effort. These same sites also present the greatest risk to fund solvency. Over the history of the program, the sites that have affected public water supplies or sensitive environmental areas have required extensive remediation at a high cost to the PCF. A site discovered in Killington had over 80 private wells that were contaminated with a gasoline additive, MTBE. One home has had to endure the greatest disruption of use of their well, as this well was the most contaminated and at one point was used as the remediation well. It is important to maintain a sufficient balance in the PCF, in excess of the required \$1 million federally mandated reserve, to ensure there are adequate funds to provide an immediate and effective response where public health is at risk.

Legislative transfer of funds continues to be a risk to fund solvency. In FY09, \$2.8 million was transferred out of the PCF and as a result some cleanups had to be delayed. According to a 2005 actuarial study, the Fund was “**projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011.**” This actuarial assessment was prior to the subsequent increases in AST heating oil releases and it did not foresee any potential legislative transfers of assets from the fund. Maintaining a healthy cash balance above the federally mandated \$1 million reserve is important to the long-term success of the fund. The \$2.8 million legislative transfer of PCF funds expands the gap between projected liabilities and fund assets.

## Review of Receipts to the Fund

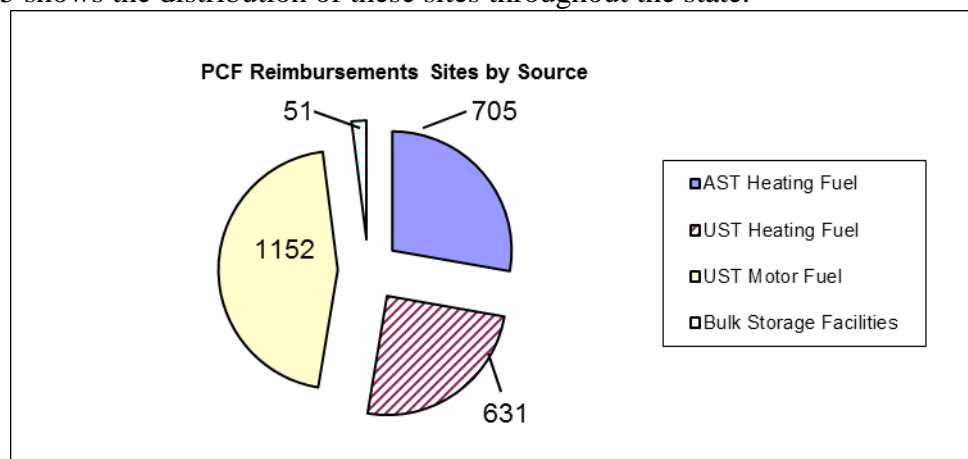

A review of fund receipts for FY14 is summarized in Attachment 1. In FY14, total fund receipts for the motor fuel account were \$4,228,250. This represents a decline in revenue of \$20,489 as compared to FY13. Owners of “Category One” storage tanks paid \$178,100 in tank assessment fees, which was an decrease over past years tank assessment fees. The distributor licensing fee, a one cent per gallon assessment of all motor fuels sold in the state, contributed \$3,850,278, an increase of \$41,670 over last year’s income. Other income includes the repayment of loans, \$179,640, and interest income of \$6,715. In addition, the state successfully recovered funds totaling \$13,517.

In FY14, total fund receipts for the heating fuel account were \$1,960,952. This was a significant increase as compared to FY13. This increase was partly the result of funds for FY13 not being collected and transferred into the PCF until FY14. In addition, heating fuel usage increased in FY14 due to a cold winter.

## Review of Disbursements from the Fund

A review of fund disbursements for FY14 is summarized in Attachments 1, 2, and 3. In FY14, motor fuel account disbursements totaled \$4,426,913 and heating fuel disbursements totaled \$1,523,927. These included \$3,543,043 for remedial action for UST motor fuel sites, \$162,945 for the UST replacement loan program, \$59,327 for the residential UST removal grant program, \$301,746 for the residential AST removal grant program, \$450,903 for remedial action for UST heating fuel sites, \$694,391 for remedial action for AST heating fuel sites, and \$369,715 for third party claims.

Disbursements for remediation represented a total of 2,539 different sites (Attachment 2 & 3), which includes sites where remediation occurred in prior years. The figure below provides a breakdown of the types of PCF reimbursement sites. These sites are located throughout Vermont in 196 different towns. Attachment 5 shows the distribution of these sites throughout the state.

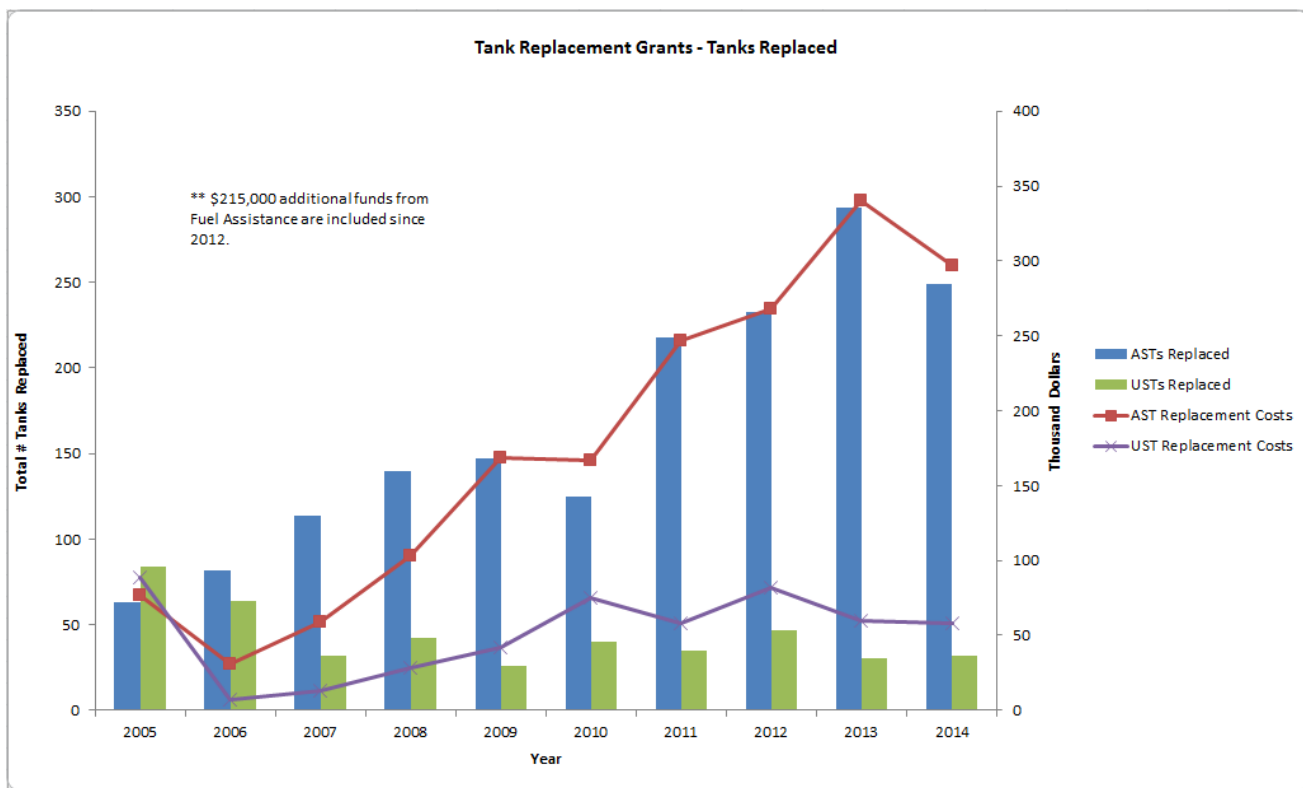

Third party claims continue to represent a small portion of overall disbursements (five percent). At the end of FY14 the PCF has paid \$5,484,518 for all third party claims, with \$369,715 paid out in FY14.

### **Investing in Prevention Activities**

Important leak-prevention activities have been funded by the PCF over the years that have helped to mitigate risks and reduce future costs. These include providing grants to farm and residential properties to remove and replace aging aboveground and underground heating oil tanks, and providing interest free loans to upgrade underground storage tanks. With the adoption of new AST regulations in October 2011 which requires routine inspection of old tanks there has been an increase in demand for the AST replacement grant. In addition, the new requirements have increased the cost of the installation. This includes installing a concrete pad and a roof for outside tanks.

The home heating oil tank removal grants were implemented (for USTs in 1998 and AST in 2004) to encourage the removal and replacement of aging tanks before leaks and releases occur. The average cleanup cost for home heating USTs is \$15,470, and ASTs cleanup costs have averaged \$11,097. The committee believes these grants have been an excellent investment, as millions of dollars on cleanup costs have been avoided by removing these tanks before they leak. In total, 32 grants were approved in FY14 for the closure of residential heating oil USTs. Total reimbursement in FY14 for UST grants was \$59,327 which brings the total amount awarded for USTs since the program began to \$834,681. In addition, 249 grants were approved in FY14 for the replacement of residential heating oil ASTs. Total reimbursement in FY14 for AST grants was \$301,746 which brings the total amount awarded since the program began to \$1,399,908 in AST grant funds. In addition to these funds, the Vermont Fuel Assistance program provided an additional \$100,000 to be used for AST replacement at residential properties with low income homeowners. The current annual demand for the grant program is approximately \$450,000. The authorized budget of \$350,000 for FY14 has already been fully awarded. The committee recommends that \$50,000 of additional funds be appropriated to cover the current demand for the program. In total the UST and AST grant program has funded the removal of more than 2,000 aging petroleum storage tanks. The figure below depicts the annual number of tanks removed and funds awarded from 2005-2012.

In FY14 six UST motor fuel loans were closed in the total amount of \$603,000.00. The agency continues to contract for services of a certified accountant to review tank owner's financials for determination of ability to repay and suggested collateral for each loan. Staff expects to receive more loan applications within the next couple of years as the owners of the single wall tanks start to make plans to remove and replace those tanks. As of June 30, 2014 the amount of \$1,323,514 was the outstanding loan balance due to the Fund. Unfortunately, some delinquency in monthly payments is being seen. Staff work with the borrower to ensure some payment is made on the account. One country store is currently the subject of a Bank Foreclosure. Staff is hopeful that a sale of the store will occur and some payment will be received.

The UST Program has received a number of inquiries from owners of commercial buildings, churches and schools (public and private) who are seeking funding sources for the replacement of their large on-premises heating oil tank. To date one school district, two private school and one town Library has received the interest-free loans.

### Effectiveness of the Fund in Meeting Its Purpose

The fund was effectively able to meet its purpose of funding cleanups and providing financial assurance for **underground** gasoline storage tank owners in Vermont in FY14. Throughout the year there was an adequate balance in the motor fuel and heating fuel account and claims were processed in a timely manner. However, a number of motor fuel contaminated sites have approved corrective action plans yet are on hold due to the limited resources in the fund.

### Reasonableness of the Cost of Cleanup

In past years, the committee has reviewed the written policies and procedures of the DEC related to UST replacement, eligible costs and reimbursement procedures. In assessing the reasonableness of the cost of cleanup, the committee has reviewed national averages and comparative data from other states. The PCF Advisory Committee has concluded that agency staff responsible for this program has exercised prudent cost containment measures. A review of an annual survey conducted by the Association of State Underground Storage Tank Cleanup Funds shows that Vermont's cost of cleaning up contaminated sites is below those of other states. The continued efforts of Agency staff have helped to maintain reasonable cleanup costs in Vermont.

## Recommended Statutory Changes to Chapter 59

The Committee makes the following recommendations:

1. Conduct an actuarial analysis of the PCF in 2015; and,
2. Amend the AST and UST grant program as follows:

Amend 1941(g). The owner of a farm or residential heating fuel storage tank used for on-premises heating or an underground or aboveground heating fuel storage tank used for on-premises heating by a mobile home park resident, as defined in section 6201 of this title, who desires assistance to close, replace, or upgrade the tank may apply to the Secretary for such assistance. The financial assistance may be in the form of grants of up to \$2,000.00 or the costs of closure, replacement, or upgrade, whichever is less of an AST located inside a structure, up to \$3,000.00 or the costs of closure, replacement, or upgrade, whichever is less of an AST located outside a structure, and up to \$4,000.00 or the costs of closure, replacement, or upgrade, whichever is less of an UST. Grants shall be made only to the current property owners, except at mobile home parks where a grant may be awarded to a mobile home park resident. To be eligible to receive the grant, an environmental site assessment must be conducted by a qualified consultant during the tank closure, replacement, or upgrade if the tank is an underground heating fuel storage tank. In addition, if the closed tank is to be replaced with an underground heating fuel storage tank, the replacement tank and piping shall provide a level of environmental protection at least equivalent to that provided by a double wall tank and secondarily contained piping. Grants shall be awarded on a priority basis to projects that will avoid the greatest environmental or health risks. The Secretary shall also give priority to applicants who are replacing their underground heating fuel tanks with aboveground heating fuel storage tanks that will be installed in accordance with the Secretary's recommended standards. The Secretary shall also give priority to lower income applicants. To be eligible to receive the grant, the owner must provide the previous year's financial information, and, if the replacement tank is an aboveground tank, must assure that any work to replace or upgrade a tank shall be done in accordance with industry standards (National Fire Protection Association, or NFPA, Code 31), as it existed on July 1, 2004, until another date or edition is specified by rule of the Secretary. The Secretary shall only authorize up to ~~\$350,000.00~~ \$400,000 in assistance for underground and aboveground heating fuel tanks in any one fiscal year from the Heating Fuel Account for this purpose.

For each site with an affected receptor the number of actual Vermonters exposed to contamination can vary. The actual users for public water supplies can be as low as 25 people per system to as high as many thousands of users. For sites with affected private water supplies, the number of contaminated wells depends on the specific conditions of the site. On average there are approximately three contaminated wells discovered per site, with an average of 3 users per household. However, one of the 161 sites listed above involved contamination to over 80 wells affecting approximately 240 users, and a site discovered in 2002 involves contamination to over 30 wells, including a public water supply, affecting hundreds of users. Surface water impacts can affect both public health and the environment. High concentrations of petroleum in a stream can cause detrimental affects to biota, and lead to an increased exposure to stream users. Lastly, sites with indoor air impacts can lead to the greatest risk to public health. Petroleum vapors entering a home can be at levels that are explosive. More often petroleum vapors reach levels that pose a serious health risk. Of the 141 sites with indoor air impacts, the number of exposed individuals varied from site to site. An average site involves three homes affected with approximately three persons per home.

## Attachment 5: Distribution of Vermont PCF Sites

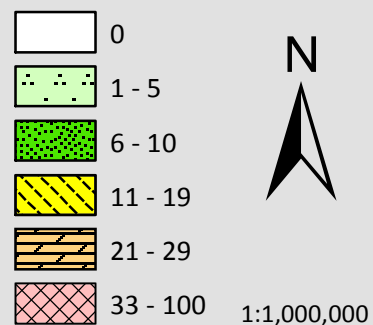

Agency of Natural Resources

### Most Active Vermont PCF Towns

Town	Count
Burlington	79
Bennington	73
Stowe	67
Montpelier	56
Rutland City	55
South Burlington	55
Brattleboro	53
Barre City	50
Waterbury	48
Springfield	45
Hartford	44
St. Johnsbury	43
Rutland	37
St. Albans City	35
Woodstock	34
Middlebury	31
Essex	30
Berlin	27
Shelburne	26
Williston	26

### PCF Sites by Town '14

This map represents the distribution of sites in Vermont that have received PCF funding through the 2014 fiscal year. Towns are labeled by the number of sites that have received such funding.

\*A small number of sites were removed from this list as part of a data cleanup from 2012 to 2013.
