

Integrated Manure Management System

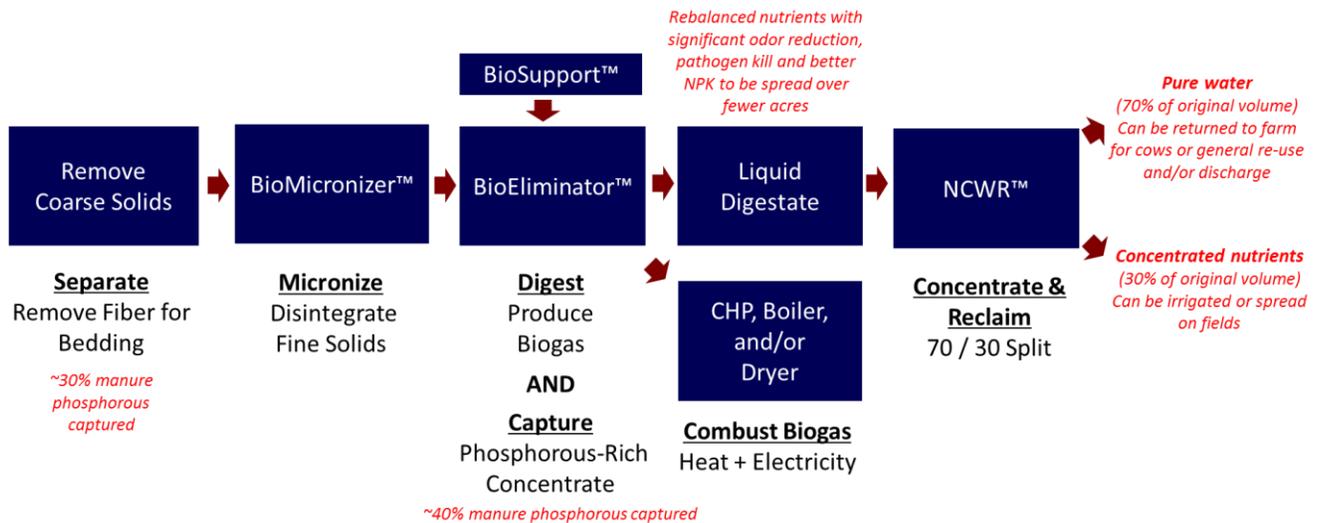

IMMS™

The total solution for your manure!

Benefits include:

- ✓ Reduce costs for manure hauling and spreading
- ✓ High-quality biogas for heating and power generation
- ✓ Concentrate and separate the nutrients in manure for targeted crop application + higher yields
- ✓ Reuse clean water as animal drinking water to reduce freshwater consumption
- ✓ Reduce odors, manure trucks on the road, and greenhouse gas emissions
- ✓ Improve relations with the EPA, State DNR and your local community

Based around four proprietary technologies, the IMMS turns your manure into animal bedding, valuable fertilizer, green energy, and clean, drinkable water.
