All, attached is the first of 12 PDFs of emails and attachments in response to your FEMA public records act request(s). The emails are in reverse chronological order. Each PDF is roughly 20 to 55 pages, for a total of 474 pages. I have redacted phone contact information. Where possible to separate, I have omitted emails regarding meeting planning and emails regarding FEMA's participation in things other than the State Hospital and the Waterbury State Office Complex. Except for one email asking for an attachment when Brunette could not reach Duchac, Commissioner Flood and Brunette were not independently in touch. Similarly, Michael Kuhn's only independent communication with Brunette is an email in which Brunette forwards FEMA handouts regarding project worksheets. I have omitted one email from Brunette in which Bill Duchac is cc'd because it involves extremely large attachments. The text of the email is two sentences, noting "4 DBI reports" attached and awaiting more reports. DBI reports are extremely detailed, building-by-building reports regarding flood damage created by Lexington Insurance Company. Each report is a couple hundred pages.

If you want any of the above-described emails or attachments, let me know.

Thank you and have a good weekend,

Sarah

Sarah London
