**Subject:** VHHIS Follow-Up

Faith – Below find some follow-up from our testimony on the VHHIS.

Shayla

**Do we know the out-of-pocket expenses for people 65+? How about the percent that are underinsured?**

- 32% of adults 65 or older were underinsured in 2018
- 75% of adults 65 or older reported their household had \$500 or greater out of pocket medical expenses in the last year
  - On average, adults 65 or older reported their household spent \$2,300 on all healthcare costs in the last 12 months

**Where is the report?**
