Subject: RE: I Hemp Sampling and Analysis Announcement Letter

This looks good to me.

The word "increased" in the second paragraph I believe should be "increases".

Couple of questions:

- 1) Do we know what kind of sampling we will require?
- 2) Have we figured out how many samples we will do and how they will be selected
- 3) Where are we with the Governor's office and James Pepper?

I spoke to Pepper yesterday and they would like to do something soon... ideally sometime next week.
Are we feeling like we are ready?

Happy to chat briefly tomorrow.

Hello,

Put some comments in track changes. It is attached. Also as to who to address, is this being sent to each current registrant and also posted on the web?

Subject: I Hemp Sampling and Analysis Announcement Letter

Attached is the cleaned up version of the industrial hemp sampling and analysis letter we have been working on. The addressee is a little stilted, but I wasn't sure who we should address this to.
