

Hello. My name is Faye Davis. I am nine years old and honored to be here today. I have learned about animal extinction from reading and school. When I grow up I want my children to be able to see all of the amazing creatures such as tigers, pangolins, rhino, sharks, elephants, and so many more.

Guess what! There are only two female Northern White Rhino left in the world and as of last year, there are no more male Northern White Rhinos. Also, 96 elephants are killed each day.

When one animal becomes extinct, it affects all of us. Imagine growing up in an environment without these amazing animals. Would you want to? I do not. Please help the world by making Vermont the 10th state to support our endangered species.

Thank you.
