Subject: Stay on 5G; Bill H.513

Dear Senate Finance Committee and Senate Committee on Health & Welfare,

Regarding bill H.513, please note that the harmful-to-health 5G is concealed in the term "broadband", despite these terms not being equivalent.

Please amend sections 19A(1) & (2) because they allow 5G implementation under the cover of broadband expansion called "one-touch-make-ready".

Place a stay on the attachment of 5G antennas to poles/towers until that technology has been thoroughly vetted for safety and health effects. This should include 4G antennas that can be upgraded to 5G via software.

Please study the roll-out of 5G with caution. Your care is what stands between public health and safety and the lack thereof.

Thank you for your time and attention to this very critical matter.

Best,

Laurie Larson & Monica Brager
