Subject: 5G concerns

Dear Legislators,

I'm writing out of concern of implementing technology which has never been properly tested in terms of health effects and it's other implications for our society. I would like you to postpone the implementation of this 'roll-out' while we consider the issue more carefully. Some cities have banned this technology for viable reasons and these reasons should be considered.

Please amend the language in bill h.513 sections 19a; Please do not allow 5g to be implemented under the cover of broadband expansion called "one-touch-make-ready."

Place a stay on the attachment of 5g antennas to poles and towers until proven safe and reliable, including 4g antennas that can be upgraded to 5g via software.

Thank you,  
John
