How about a statement from GPS in advance of the afternoon commute? He's ok with it if you all think it would be helpful. I'm on a call for the next 30 but then can work something up.  
Thanks!

**Subject:** Plows

Hi Scott,

Still developing, but there have been a number of incidents involving plow trucks today. Several rear enders and a couple of side swipes. I don't have any data from VSP on the individual crashes, but WCAX called and they have video on at least two of them.

Without reports on fault or citations, I can't give anything concrete, but it's clear that people are not giving our trucks the space we need to operate. This is one of our standard talking points, it's clearly not getting through today. Visibility has been terrible and trucks kick up their own clouds, but people need to slow down in general.

We'll keep you posted,

Erik
