

Public Comment on H.51, H.175, H.214
April 23, 2019

Dear Legislators,

I stood at the voting booth during election time with a poster telling voters to Vote for the Climate. See the attached photo of my sign. I said it is the most important decision in your life time. I voted for people that I felt had the guts to stand up and fight for the issues about climate change. Now I'm finding out that not only does the Vermont Legislators not have the backbone to do the fight, but they don't even want any of the bills to come there way. I'm furious. I promise that fury will play out in the next election if you don't get off your butts and pass the three bills about the fossil fuel infrastructure: H.51, H.175 and H.214.

I'm so tired of politicians not listening to their constituents. If you are too tired to do the work, then retire and get out of our way of those that care about these issues.

Looking away is a crime against humanity. This was my other political sign for many climate change rallies. Please, stand up for humanity. Stand up for the children of this planet that will be inheriting the devastating effects of climate change. Stand up for what we are asking of you and do your job!

Sincerely fighting mad,
Carole Petrillo
