

As a Christian and Vermont resident, I am appalled that H.57 proposes to legalize the murder of children any time up to the moment of birth. Science is clear that life begins at conception, yet H.57 proposes to consider a fetus property without rights and not life, to be disposed if not wanted by the mother without qualification up and to the point of birth. Is the next bill to allow abortion of minor children if we decide they are too much of a burden? Where does legislature draw the line on protecting the rights of those that need protection?

I do not support H.57.
