

Madame Chair:

The Department's primary expert on this issue is out on paternity leave, and his supervisor is a section chief on the emergency response to COVID-19.

The Department supports the language passed by the Senate. The deadline for the work is reasonable and if the State's response to COVID-19 makes finishing impossible, there will be sufficient time during the 2021 session for the Department to over testimony to that effect.

Best,
David
