Advocates:

- Disappointed in the process before
- How are we going to go forward in a smart way
- We need good analysis but we don't want this to be a long process.
- The governor, the house and the senate support this. Majority of the legislature supports divestment believes it will protect pension holders.
- Concerned with public comments.
- Governor has been incredibly clear we should follow california's lead and do this in an expeditious manner. The governor is very pleased with the progress, it seems like everyone is on the same page in that divestment is a good idea. Thankful for the process.

senate letter, house resolution, my document, gov letter/press

mechanics not actually divesting by May 2,
