

#ActOnClimateVT

**To the members of the Vermont Senate:
We, the 534 undersigned, ask that you**

please support the package of more than \$200 million in critical climate investments that were included in the House-passed budget and transportation bills, which will help cut climate pollution and advance equity.

These investments must include, at a minimum:

- \$80 million for low- and moderate-income weatherization;
- \$20 million for low- and moderate-income electrical upgrades;
- \$5 million for heat pump water heaters for low- and moderate-income Vermonters;
- \$48.4 million for municipal energy resilience in H.518;
- \$19.25 million for electric vehicle charging infrastructure;
- \$22 million to support electric and efficient vehicles;
- \$2 million for energy storage and load management; and
- \$5 million for advanced metering infrastructure.

This set of investments will be crucial to implementing the state's recently-adopted Climate Action Plan and meeting our statutory climate pollution reduction targets. These investments will also help Vermonters access more affordable clean energy options to get around, electrify, and heat and weatherize our homes, and help our municipalities improve their energy resilience.
