

Denise, I am writing you as a concerned citizen on the proposed Burlington charter changes.

I was born and raised in Burlington and it bothers me immensely to see what Burlington is becoming. This State is the safest in the nation for a reason. Even with all the drug problems and its influx of people from out of State, it is still the safest State in the nation. We don't need any additional gun laws. We just need to enforce the laws that are on the books.

By allowing Burlington to change its laws will affect every law abiding citizen in the State. The laws were made for the State not for cities and towns that want to change them to suit themselves. It really galls me that we have so many people that have moved here and they run for office and try to change the laws here that has worked for so long. Enough is Enough.

I hope that these charter changes are shut down for the good of all. Sincerely, Raoul Beaulieu (North Hero)
