

## Fact Sheet: Vermont

# Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig  
AARP Public Policy Institute

***Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 45 percent of Vermont 's private sector employees—roughly 104,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.***

Currently in Vermont, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

### Vermont's Situation by the Numbers

About 45 percent of Vermont workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in Vermont businesses with fewer than 100 employees are much less likely to have access to a plan (61 percent) than workers in larger businesses (29 percent). In raw numbers, about 69,000 small-business employees do not have access to a retirement plan compared with about 35,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 63 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (44 percent) or a bachelor's degree or higher (38 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a high school degree who did not have access to an employer plan (57,000 versus 9,000).

- **Workers at all earnings levels do not have a plan:** More than 79,000 of Vermont employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 76 percent of the 104,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 56 percent of Hispanic workers and about 51 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 7 percent (7,000) of the roughly 104,000 employees without a workplace retirement plan.

### Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.<sup>1</sup> Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.<sup>2</sup>
- **Helps increase retirement income:** Social Security is essential to retirement security, but its

average retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.<sup>1</sup>

- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

**Vermont: Who is NOT Covered by a Workplace Retirement Plan?**  
(percentage and number of private wage and salary workers ages 18–64 whose employer does not offer a retirement plan)

Item	Group	%	Number
	ALL	44.5%	104,408
Age	18–34 years	55.0%	48,419
	35–44 years	38.5%	19,347
	45–54 years	36.7%	18,382
	55–64 years	39.4%	18,260
Race & Ethnicity*	Hispanic	56.2%	1,831
	Asian (non-Hispanic)	45.9%	2,107
	Black (non-Hispanic)	51.0%	1,410
	White (non-Hispanic)	44.0%	96,929
Education	Less than high school	63.0%	8,844
	High school	50.2%	38,984
	Some college	44.2%	29,627
	Bachelor's or higher	37.5%	26,953
Gender	Male	43.6%	51,398
